# Luxury Seven Night Accommodation Package

Having everyone in the same hotels has become an integral aspect of the European BaT events. There is always a great atmosphere amongst the clients and staff and we want this to continue with our Iberia trip. The social aspect is as much a part of our events as the track days, and something we pride ourselves on. For us it's not just about the track days, it's about the experience and the trip as a whole. Steered together by our common interest, it is the perfect opportunity to meet other people on the trip. Review your laps of Jerez with like-minded people over dinner and drinks after a day at the circuit. Our aim is to make everyone feel part of the team and to build a strong relationship from the start. An added bonus of our hotel package is that it relieves you from the arduous task of searching hotels for yourself, just leave it to us.

To further improve on the interaction and to encourage early friendships to form, we are hosting a welcome reception meal at Hotel Cascais Miragem on the evening of Tuesday 5th September 2017 at 20:00 (this will be a buffet style dinner). At the end of the event, we will also be hosting a finale dinner at the Barcelo Montecastillo Golf Club on Monday 11th September at 19:30, which will be a 3 course set menu dinner this is included as part of the luxury hotel package.

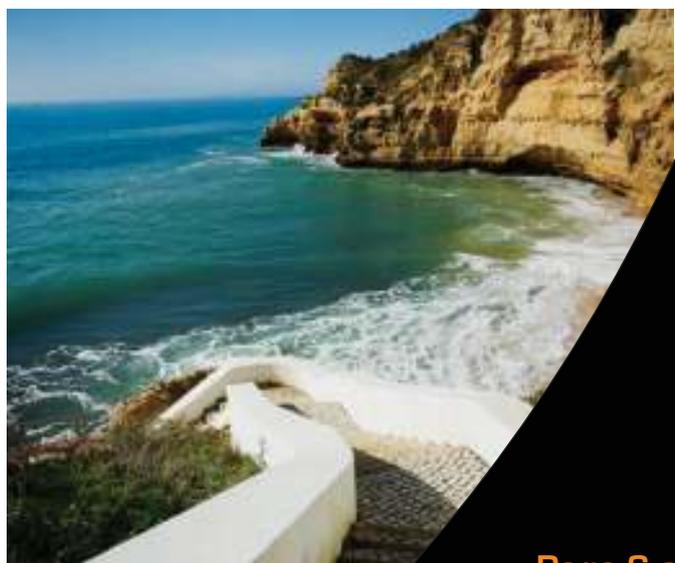

For those of you who would like to take advantage of our hotel package, details of the hotels, facilities and the full addresses can be found on the following pages. All luxury 5\* hotels have been chosen for their proximity to the circuit, facilities and availability of parking.

**IMPORTANT NOTE - Please be aware that any extra meals, beverages, room service, parking, spa treatments or additional sporting activities purchased at any of the hotels during your stay will be charged per room and must be settled on departure.**

**IMPORTANT NOTE - All accommodation and car transport must be booked and paid in full by Friday 05 May 2017.**

Please can all clients who book the organised hotel package complete the attached hotel registration form and email to [kirsty.marriott@bookatrack.com](mailto:kirsty.marriott@bookatrack.com) no later than Friday 02 June, as this will speed up the check-in process considerably.

We have a limited number of rooms available. We are aware that cheaper deals may be found by using one of the online booking agents such as hotels.com, booking.com or expedia.com. Please note that the accommodation is offered at cost at today's exchange rate (BaT have pre-purchased the euros to guarantee the rates). # Estoril Circuit

The Estoril circuit was built in 1972, on a rocky plateau near the village of Alcabideche, 9 km from the city of Estoril. The beach resort lends its name to the circuit, which has undergone numerous transformations since then. After a massive upgrade programme in 1984, the circuit attained international status. It was the home of the Formula One Portuguese Grand Prix from 1984 to 1996.

Estoril is a circuit of huge contrasts, it has two hairpin turns, noticeable elevation changes, and a long (986 metre) start/finish straight. The main straight is one of the longest in Moto GP, allowing for speeds in excess of 310km/h, whilst the chicane is one of the slowest. It offers a unique configuration: a long straight followed by a series of highly technical sequences. The contrast between the fast and slow sections requires a versatile car, with a good top speed and agility through the series of fast bends. This challenging layout along with the massive breaking zones all combine to make an exhilarating lap. Certainly a place to mark off the track day list.

## Facilities

Restaurant - On site for lunch and snacks.

Garages - Are available to reserve for £100, please book via our website. Platinum members have free shared use of a garage.

Fuel - There is a fuel station in the paddock, you can pay by cash or card. Limited operation hours, we will inform you of the opening times in the briefing.

Left corners: 4

Longest straight: 986 metres / 0.61 miles

Noise Limit: Unsilenced

# Portimao Circuit

Portimao circuit was built from scratch in just six months and opened in 2008. From the moment you turn in the main entrance you can't fail to be impressed with this no compromise state of the art motorsport facility. There are 32 different possible layouts at Portimao circuit, with lengths ranging from 3,465 m, the shortest version, to 4,684 m for the F1 version (the longest), making it suitable for hosting all types of automobile and motorcycling world championships at the highest level of competition. The different combinations of layouts allow users to choose between the faster, challenging versions or the twisty, more technical versions. Given the various layouts of the track, we consider the FIA Slow Fast (F1) version to be the standard version.

This circuit has a high-speed roller coaster style layout, like no other. It is an amazing technical race track with many elevation changes and blind crests with good opportunities to overtake because of the circuit width. This circuit, much like the old school circuits and needs respect, but once you get the hang of the blind crests and tricky cambers it's somewhere you can really let yourself go.

## Facilities

**Restaurant** - There is a self service restaurant open all day for drinks and snacks and buffet lunch

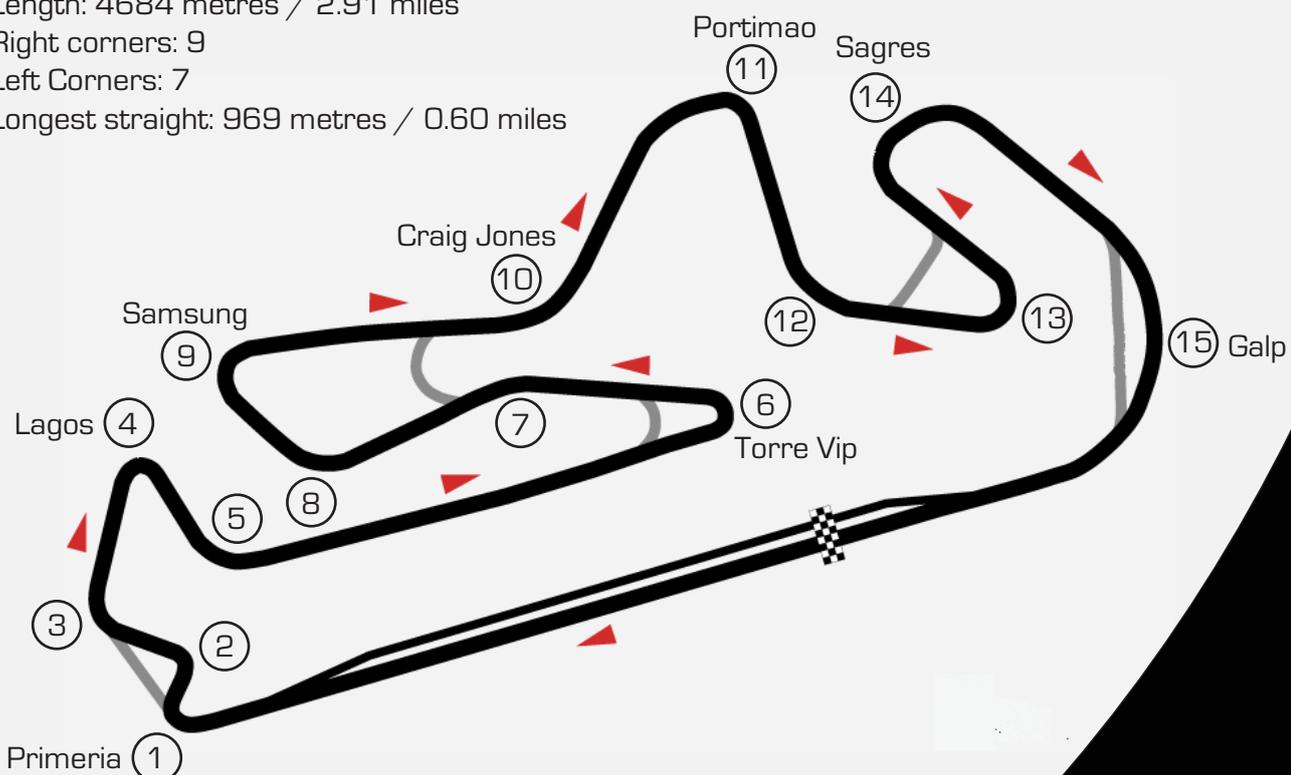

**Garages** - Are available to reserve for £100, please book via our website. Platinum members have free shared use of a garage.

**Fuel** - 98ron on site but you pay for it in advance for the estimated amount of litres and you get a card from the circuit to use each time to refuel.

Right corners: 9  
Left Corners: 7  
Longest straight: 969 metres / 0.60 miles

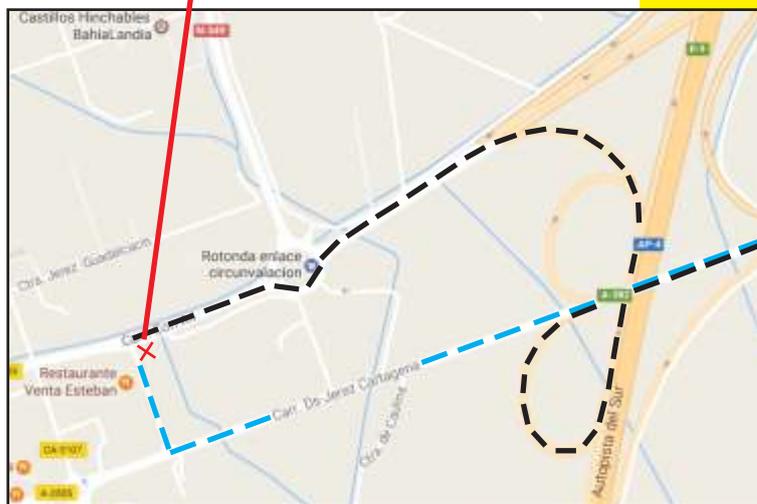

# Jerez Circuit

Circuito de Jerez is one of the most attractive tracks for both motorbikes and cars. Formula One teams have had Jerez as their home testing circuit for many years, which backs up the quality of the facilities.

For the motorbike riders Jerez is, together with Assen, the reference. Its 13 curves give plenty of possibilities when tuning up the machines. Its 4.423 m of length (4.428m with chicane) houses a variety of low, medium and fast speed curves, technically ideal to work the mechanics in-depth, as recognised by the top motor racing teams, who have made the circuit an international reference point for testing along the year, particularly in the pre-season.

# Additional Track Day Information

## Mechanical Support

Tyre changing facilities are available at all venues. We strongly recommend that you inform us if you require any work during this trip. If you want your wheels swapped at the end of the day please ensure you have arranged a time slot with our mechanics. We are also able to perform some mechanical tasks including changing of brake pads and car fluids. Please note that we do not carry spares with us so you will need to provide these. Again time slots will need to be arranged with our staff. All of the above services are chargeable.

## Garages

Garages are available for reservation on each day for £100 per garage. If you would like to reserve a garage please do this prior to the event. You can edit your booking to add one if needed. Platinum members have shared use of a garage as part of their membership package.

## Fuel

Details of fuel provision are with the circuit information. This will be confirmed in our final instructions for the event. Please note it may not be possible to purchase fuel on-site with a credit card. Therefore we recommend you have Euro cash to pay for on-site fuel.

## Tuition

Professional Grade 'A' ARDS instructors will be present at all track days. All our instructors travel from the UK and know the circuits well. Instruction is recommended to all participants who have not been to the venues before as it not only familiarises you with the circuit, but also offers you hints and tips to improve your track driving. Instruction sessions are available from just £50 each and can be booked online to secure your time slot and preferred instructor.

## Food & Drink

All three circuits have exclusive catering rights, meaning we are unable to provide soup and sandwiches, however we will still be offering our usual complimentary hot and cold drink service as we would normally on our European events. Please accept our apologies for this – food will be available from the on-site café.

## IMPORTANT NOTE - Jerez Circuit - Proof of health Insurance

The local hospitals to Jerez do not recognise the European Health Insurance Card as a valid payment method for health care when participating in activities at the circuit, therefore all participants are required to send in a photocopy of their valid health insurance to [kirsty.marriott@bookatrack.com](mailto:kirsty.marriott@bookatrack.com) as well as bringing the documents with you to the event. We will send out a reminder near to the time of the event but the sooner we receive a copy the better.

## BaT Photography

There will be a professional motorsport photographer in attendance taking pictures of all participants from various points around the circuits. These will be available to view/buy on-site and via our website when we return to the UK. Please remember to tape-up (or take off) your number plate if you don't want to be spotted at the circuit – as all images are uploaded to our website unedited.

## BaT Car Transportation

For your convenience, we offer a car transportation service whereby your car is taken fully insured by a covered car transporter from the UK to all three circuits and finally back to the UK. Several trucks will be departing from Donington Park Circuit on Thursday 31st August. If you intend to book 'Bring my Car', please note your car must be dropped off at our workshop the week before the truck departs.

Exact pricing will depend on the size and weight of your car, as well as any wheels/tyres and tools that need to be carried. Prices start at £1295 for a Caterham-sized car (up to 3 metres) with luggage inside the cockpit, up to £1495 for larger cars with a separate set of wheels & tyres.

European clients can have their cars transported too but unfortunately the price is the same as travelling from the UK.

# Caterham Hire - Arrive & Drive Service

Are you interested in our arrive and drive Caterham hire package? On arrival at the circuit one of our track prepared Caterhams will be available for your exclusive use. Our Caterham fleet includes one Caterham Academy, one 310R SV, one 360R, one 420R and one 620R. The 310R SV has the slightly wider longer chassis for taller broader drivers.

## Caterham Academy

The Caterham Academy is ideal for those new to driving a Caterham or indeed to circuit driving. With a Ford Sigma 1.6 engine and 125bhp mounted to a five speed gearbox, it gives an idea of the thrill you can have behind the wheel of a Caterham. With the hire of the Academy car we also offer your own exclusive instructor all day included as part of the car hire package so you will make the most out of your day learning how to handle the car, the circuit layout and circuit driving techniques.

## Caterham 310R SV

The 310R was new to Caterham in 2016 and came as an upgrade to the Caterham 270. Jumping from 135bhp to 152bhp, the 1.6 Ford Sigma engine carries the power superbly. The only SV in our range, the longer, wider chassis of the 310R makes it ideal for taller, broader drivers, adding a bit of comfort to your track day experience.

## Caterham 360R

The lightweight 360R sits perfectly balanced in the middle of the Caterham range. Normally suitable for either road or race performance, the R pack on our 360 transfers it perfectly into a spectacular track car. Powered by the same 2.0 litre Duratec engine that propels the R300 race cars, the 360R houses its 180bhp as perfectly as the R300.

## Caterham 420R

The 420R is the penultimate machine in the Caterham line up. Again powered by the familiar 2.0 litre Duratec engine, it boasts an incredible 210bhp. In keeping with Colin Chapman's 'less weight more power' ethos, the 420R is as lightweight as they come and is guaranteed to deliver pure thrills lap after lap.

## Caterham 620R

The new Caterham 620R features a wide range of performance enhancements that will see it surpass the R300's legendary status and then some. Words can only help so much with describing what a supercharged 310bhp Caterham with a power to weight ratio knocking on the door of 600hp per tonne is like to drive. This machine is certainly not for the faint-hearted.

# Safety Briefing & Summary

## Overtaking Rules

- Overtake on the straights only, not under braking and not round corners.
- Overtake on the LEFT hand side only.
- Overtake BY CONSENT ONLY. This means the car in front must have clearly indicated and pulled over to the right before any overtaking manoeuvre can be made. If the car in front is not indicating, assume they have not seen you.
- Powerful cars are expected to lift off the throttle on the straights to allow the less powerful cars to pass before the braking zone.
- If these rules are obeyed, then car-to-car contact is impossible and the only element of danger is your own driving.
- Finally, remember to do a cool down lap each time before you return to the pits and avoid using the hand brake when parked up.

## General Notes

- No hand-held cameras are allowed. All cameras must be securely mounted.
- Slick tyres are not permitted without adequate roll-over protection.
- Please ensure you have your towing-eye fitted before venturing out on track.
- All participants must have covered arms and legs when out on track.
- All drivers must have a full road licence (race licence is not a valid substitute).
- Strictly no timing.
- No passengers under 16 years are allowed out on track or in the pit lane. Passengers between 16 and 18 years old must have a parent / guardian on-site at all times and they must counter sign their disclaimer.

## Know Your Flags

**YELLOW** - Used when a car, debris or other object is causing a hazard on the circuit (often a car spinning), and this hazard can be removed quickly with minimal disruption and in complete safety. Please slow down and be in complete control of the car.

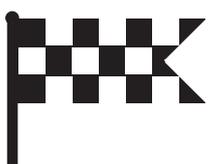

**RED** - This is shown when the session must end due to a hazard that cannot be removed quickly and safely. Please return to the pits very slowly.

**BLUE** - Used to show a participant that there is a faster car approaching. Participants must indicate and move over to the appropriate side of the track on the next available straight.

**BLACK** - To be used when a participant is driving discourteously or has a mechanical problem with their vehicle. Participants must come straight into the pit lane for an explanation.

**CHEQUERED** - Used to indicate the end of the session. Only shown twice (once before lunch and once at the end of the day).
